IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with <u>underlining</u> and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please amend claims 40, 52, 54, 56, 60 and 61 in accordance with the following.

Claims 1-39 (Cancelled):

Claim 40 (Currently Amended): An information storage medium, comprising:

at least one title <u>audio/video data stream</u> which is reproduced as a motion picture ~~and has title identification information used for a title search~~; and

<u>index information comprising startup information designating a title audio/video data stream which is played back automatically when the information storage medium is loaded in a reproducing apparatus, and</u> title information, which corresponds to <u>each of the title audio/video data streams</u>~~the at least one title~~,

wherein the title information comprises title access type information indicating whether <u>reproduction of the title audio/video data stream</u> ~~title reproducing~~ by ~~the~~ <u>a</u> title search ~~to the corresponding title~~ is permitted.

Claims 41-51 (Cancelled):

Claim 52 (Currently Amended): A reproducing apparatus <u>for reproducing at least on title audio/video data stream from</u> ~~supporting title reproducing by a title search using~~ an information storage medium, comprising:

a reader which reads <u>index information from the information storage medium, the index information comprising startup information designating a title audio/video data stream which is played back automatically when the information storage medium is loaded in the reproducing apparatus,</u> ~~titles, each of the titles~~ having title identification information used for the title search, and title information corresponding to <u>each of the title audio/video data streams</u>~~the respective~~

~~titles from the information storage medium~~; and

a decoder which decodes the title audio/video data stream ~~a title reproducing manager which determines whether to reproduce the title designated by the title search~~ based on the title information,

wherein the title information comprises title access type information indicating whether reproduction of the title audio/video data stream ~~title reproducing~~ by ~~the~~ a title search ~~to the corresponding title~~ is permitted.

Claim 53 (Cancelled):

Claim 54 (Currently Amended):   The apparatus of claim 52, wherein the ~~title reproducing manager~~decoder interprets the startup information from the ~~title~~ index information and decodes one of the titles corresponding to the startup information first.

Claim 55 (Cancelled):

Claim 56 (Currently Amended):   The apparatus of claim 54, wherein the ~~title reproducing manager~~decoder comprises:

a browsing engine decoding the browsing data and executing browsing commands from the decoded browsing data;

a program engine decoding the program data and executing program commands from the decoded program data;

a navigation engine decoding navigation commands in the titles and the title information;

a presentation engine decoding the AV data; and

an application manager controlling reproduction of the titles based on whether a portion of each title is startup information, core mode data, or full mode data and user input when the attribute information designates that the respective title is controllable by the user.

Claims 57-59 (Cancelled):

Claim 60 (Currently Amended):   The information storage medium of claim 40, wherein reproduction of the title audio/video data stream by the title search ~~the title search to the~~

~~title~~ is permitted when a value of the title access type information is 0, and <u>reproduction of the title audio/video data stream by the title search</u> ~~the title search to the title~~ is prohibited when the value of the title access type information is 1.

     Claim 61 (Currently Amended):   The reproducing apparatus of claim 52, wherein <u>reproduction of the title audio/video data stream by the title search</u> ~~the title search to the title~~ is permitted when a value of the title access type information is 0, and <u>reproduction of the title audio/video data stream by the title search</u> ~~the title search to the title~~ is prohibited when the value of the title access type information is 1.
